FRAMEWORK
CONVENTION ON
CLIMATE CHANGE

Distr. GENERAL
May 31st 2015

ENGLISH

Negotiating Text

A. Preamble

The Parties to this agreement,

Being Parties to the United Nations Framework Convention on Climate Change, hereinafter referred to as “the Convention”,

Guided by the objectives of the Convention as set out in its Article 2 and in accordance with the principles and provisions of Articles 3 and 4 of the Convention,

Recognising that the representation of actors other than states is crucial to achieve an ambitious agreement on climate change, and welcoming the new Parties to the Convention to their first conference, as set out in the amendment to the Convention concerning Article 20 proposed during the 19th Conference of the Parties in Warsaw,

Noting that cooperative action among subnational authorities, intergovernmental organizations, civil society, indigenous peoples, the private sector and other non-state actors and natural entities can enhance the impact of a global agreement on climate change,

Acknowledging that climate change is a global emergency requiring immediate collaboration of all Parties, states and non states,

Recalling the conclusions of the fifth Assessment Report of the Intergovernmental Panel on Climate Change on the anthropogenic causes of climate change arising from the increasing level of greenhouse gas emissions,

Recognizing that the survival of territories of all the Parties here represented requires a two step strategy: firstly, an agreement on common visions of the future and secondly, the coordination of the individual pathways of the Parties to achieve them,

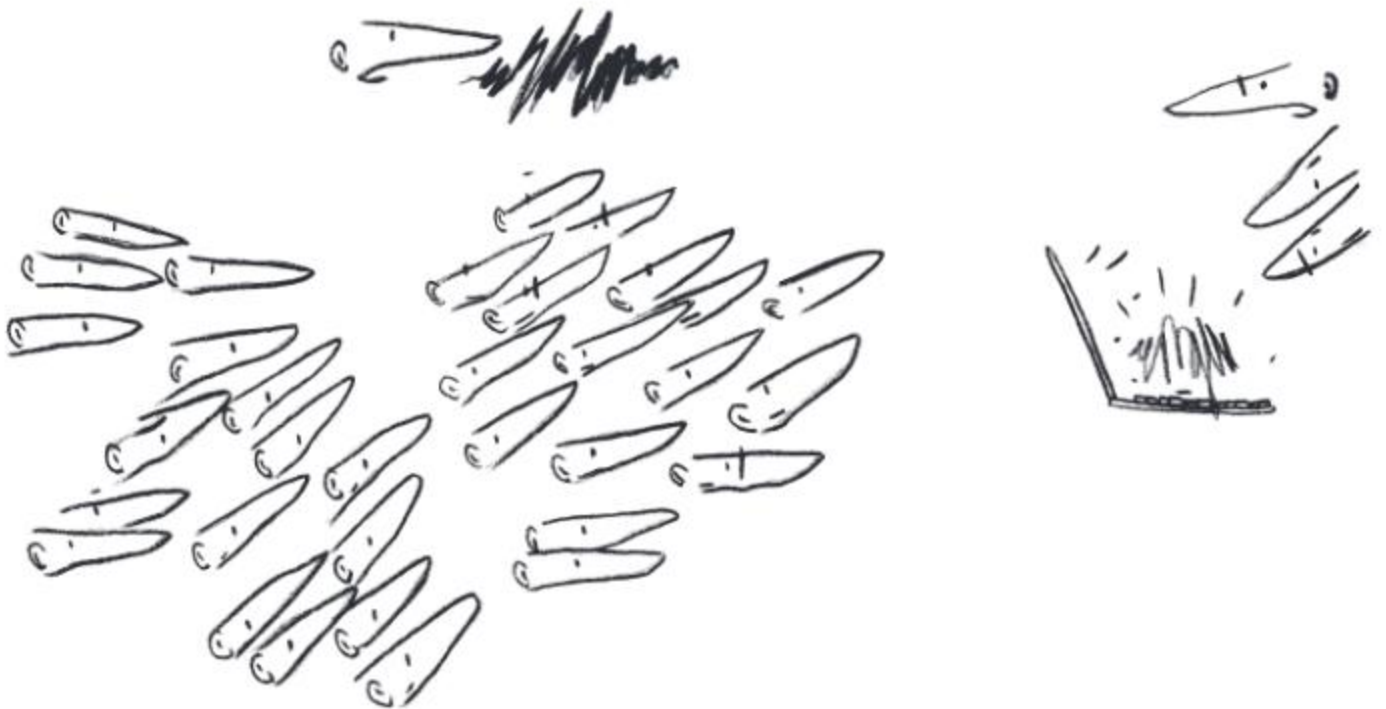

Have agreed as follows

B. Definitions

For the purposes of this agreement the following terms are defined:

- i. “Convention” means the United Nations Framework Convention on Climate Change (UNFCCC).
- ii. “Party” means a Party to this agreement, be it a state or a non-state actor.
- iii. “Entity” means a unit of representation reflecting special issues and interests linked to either the government, the economic sector, civil society, endangered territories or other issue areas of the Parties here represented.

Backstage

SECRETARIAT a, *calling an OBSERVER
on the phone before representation goes on*

Can you sum up your observations in plenary this morning, to give the DELEGATES some feedbacks, especially about the territories and representations workshop? It might help for the crisis we're facing.

OBSERVER b

Sure but what about the procedure?

SECRETARIAT c

We can propose the creation of an advisory organ, something like the Intergovernmental Panel on Political Philosophy.

OBSERVER b

Why not. Let's try and see.

Curtain.

How am I linked
with others?

Am I a network myself?

If nations are
reductions, aren't lists
reductions too?

How to negotiate with
a list of things?

How to choose
when it is necessary,
sufficient, important?

Are territories cultural?

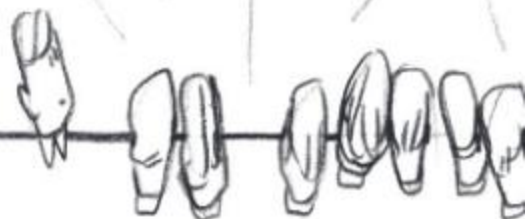

What does
resource mean?

Are soil, forests, oceans
resources?

What about money?

What does
survival mean?

How can I know
how to survive?

Is survival material?

Is survival
the cause for
which I stand
or the ground
on which I stand?

What about sovereignty?

Why should
a nation state rationally
accept to redefine itself?

Can a nation state
survive without
borders?

Aren't borders
about orders?

How can I delimit
my identity?

What are my limits?

Are my limits
delimiting my identity?
or the identity of the others?

How do I know
if I am dying?

What are my priorities?

Should my list of entities
be filled with big things?

small things?

infinitely big things?

infinitely small things?

How to end a list?

Is territory about time

and/or

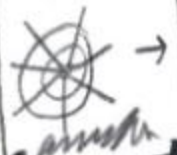

is territory about space?

Could territory

be defined

by relationships?

If the current territory
is flat, could they become
layers? bubbles? spheres?
